

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method of treating spastic disorders, said method comprising administering to a subject having a spastic disorder a therapeutically effective amount of a compound consisting of gamma-aminobutyramide, or a pharmaceutically acceptable salt thereof and independent of 4-chlorophenyl-5-fluoro-2-hydroxyphenylmethanone.

2. (Original) A method according to claim 1, wherein said administering step further comprises intrathecally delivering the compound.

3. (Original) A method according to claim 1, wherein said administering step further comprises intraventricularly delivering the compound.

4. (Canceled)

5. (Original) A method according to claim 1, wherein said administering step further comprises delivering the compound to the subject through an implantable pump.

6. (Original) A method according to claim 1, wherein said administering step further comprises delivering the compound to the subject through a spinal catheter.

7. (Original) A method according to claim 1, wherein the spastic disorder is spastic hypertonia.

8. (Original) A method according to claim 1, wherein the spastic disorder is dystonia.
9. (Original) A method according to claim 1, wherein the spasticity or spastic disorder is caused by traumatic brain injury.
10. (Original) A method according to claim 2, wherein said intrathecal delivering step comprises delivering the compound through a spinal catheter inserted in a substantially cephalid spinal location.
11. (Currently Amended) A method for treating convulsions, said method comprising administering to a subject either having convulsions or predisposed to convulsions a therapeutically effective amount of a compound consisting of gamma-aminobutyramide, or a pharmaceutically acceptable salt thereof and independent of 4-chlorophenyl-5-fluoro-2-hydroxyphenylmethanone.
12. (Original) A method according to claim 11, wherein said administering step further comprises intrathecally delivering the compound.
13. (Original) A method according to claim 11, wherein said administering step further comprises intraventricularly delivering the compound.
14. (Canceled)

15. (Original) A method according to claim 11, wherein said administering step further comprises delivering the compound to the subject through an implantable pump.

16. (Original) A method according to claim 11, wherein said administering step further comprises delivering the compound to the subject through a catheter.

17. (Original) A method according to claim 12, wherein said intrathecal delivering step comprises delivering the compound through a spinal catheter inserted in a substantially cephalid spinal location.

18. (Currently Amended) A method for treating epilepsy, said method comprising intraventricularly administering a therapeutically effective amount of a compound consisting of gamma-aminobutyramide, or a pharmaceutically acceptable salt thereof and independent of 4-chlorophenyl-5-fluoro-2-hydroxyphenylmethanone.

19-25 (Canceled)

26. (Currently Amended) A method of treating idiopathic dystonia or torsional dystonia, said method comprising administering to a subject having idiopathic dystonia or torsional dystonia a therapeutically effective amount of a compound consisting of gamma-aminobutyramide and independent of 4-chlorophenyl-5-fluoro-2-hydroxyphenylmethanone.

27-39 (Canceled)
